Town of Weymouth
Health Department.
2010

Dear Parents,

The Weymouth Health Department in conjunction with the School Department will be conducting a dental/oral screening for elementary school students.

The goal of this program is to detect any suspicious dental problems such as caries (cavities) and malocclusion (need for braces) and notify parents. With the use of gloves and a sterile tongue depressor one of our local dentists will count and examine baby and permanent teeth.

If you would like your child to participate in this free dental screening program please complete the form below and return it to school.

Sincerely,

The Weymouth Health and School Departments

Child's name: _____

Teacher and grade: _____

- Yes, my child has permission to participate in the dental screening program.**
